Northwest Cancer Specialists gets clinical trial participation award

Northwest Cancer Specialists is one of ten community oncology practices in the United States and the first in Washington and Oregon to receive a Clinical Trial Participation Award from the American Society of Clinical Oncology. The award will be presented this June in Chicago.

Fewer than 5 percent of adult patients with cancer are enrolled in clinical trials. Northwest Cancer Specialists, with nine offices, including one each in Vancouver and Salmon Creek, last year enrolled 168 patients in clinical trials.

Clinical trials are research studies for patients that are designed to evaluate whether a new therapy is safe, effective and better than current standards of care, and they allow patients to receive advanced therapies.

The award is based in part on innovative techniques, and on quality assurance audit reports.
